## Help your child get better at maths by using RMeasimaths

RMeasimaths is a **free website** that you can use with your child at home. You can access it by going to the following website or you can download a **free APP** to your I-pad or smart phone.

[www.rmeasimaths.com](http://www.rmeasimaths.com)

This website knows the level that your child is working at and it will choose activities according to this. Therefore it should not be too easy or too difficult.

All children have a login for this and it follows this format:

**Username:** JoeBloggs (first name and surname, both with capital letters and no space)  
@ hillary

**Password:** Password (capital P)

I am checking this website regularly and I can see which children are using the tool. I will be giving out prizes for the most active users towards the end of the term.

If you are having any problems accessing RMeasimaths, please do not hesitate to contact myself.

Many thanks,  
Miss Haytree

**Hillary Primary School Striving for Excellence**
